

UI Green Metric Questionnaire

University : Kamphaeng Phet Rajabhat University
Country : Thailand
Web Address : www.kpru.ac.th

[4] Water (WR)

[4.4] Consumption of treated water

	<p>The diagram shows how treated water is used for watering plants.</p>
	<p>Using treated water to water plants</p>

Description :

The university has installed a watering system across various areas to irrigate its green spaces, which make up 12.61% of the total campus area. This system utilizes treated water, releasing it into the university's water sources to irrigate the entire landscape. Through this process, the university is able to recycle over 50% of the wastewater.
